

Mitutoyo 2-Axis AOS-DRO System

KA Counter Features:

- Selectable resolutions (.00005, .0001, .0002, .0005)
- Bolt circle calculations (eliminates need to use trigonometry)
- Diameter mode (doubles reading cross axis of the lathe)
- Tool offsets (stores datum points for 10 tools that eliminates need to re-zero after tool change)
- All Necessary Hardware is included to mount to machine

AT-715 Magnetic Scales are:

- Fully submersible in coolant
- +/- .00012 Accuracy over 12"
- True absolute
- Shock resistant
- Reader head mounted on saddle guide for easier installation

FAGOR 40i Milling 3-Axis Readout Kits

40i TFT Color Prokit Mill Package Features and Functions:

- Display - 5.7" Color TFT
- DRO for 2 & 3 axes with Color TFT screen
- Linear and angular axes
- Easy setup and diagnosis
- Feedback signal monitoring
- Linear and multi-point compensation
- Radius or diameter display
- Preset and zero setting of the axes
- Incremental and distance-coded reference marks
- Tool radius compensation
- Fine/coarse axis resolution
- Easy software update through USB adapter
- 3D color display of tool path
- Bolt-hole drilling calculation
- Up to 50 part references (datum points)
- Linear drilling calculation
- Part centering
- Part alignment
- Axis coupling

ACU-RITE 300S Milling 2-Axis Readout Kits

The Acu-Rite 300S is a fully programmable 4 axes readout system, now available with a full color display. With the capability to store and create a library of programs the 300S is everything you need to create, edit and execute programs on your manual machine tool.

Console Features:

- 2, 3 or 4 axes 5.7" Full Color Display
- Multiple display views
- Feed Rate Display
- Multiple Language Support
- Absolute/Incremental
- Near-Zero Warning
- Help Function
